

Be a Water Detective - Frankie and Sameera (Teachers)

Question: What do you think Sameera wants to tell Frankie?

Answer:

There are lots of things!

She is telling Frankie about how water gets from her river to the town. How it is stored in the reservoir, cleaned at the water treatment plant and then travels in pipes to the zoo.

When it hasn't rained enough more water has to be taken out of Sameera's river for the people in the town to use. Fish get oxygen from the water and need lots of water to be able to breathe properly.

She also tells Frankie that it is important for everyone to use less water.
